

## *Classic Plus 14*

The MovinCool Classic Plus 14 has all the benefits of our proven Classic Series, PLUS new features designed to increase performance and control. The versatile Classic Plus is instantly ready to provide cool air in the hottest environments such as production lines, outdoor events, manufacturing processes, injection molding, metal forming and much more.

The Classic Plus features a digital temperature controller allowing the user to "set" the desired temperature. At 13,200 Btu/hr of cooling, The Classic Plus 14 provides the maximum capacity possible operating on standard 115V power. By cooling only the area that needs it, the Classic Plus 14 saves you money while protecting people and equipment and speeding up processes. Self-contained and portable, the Classic Plus 14 requires little or no installation - simply roll it in, plug it in and turn it on.

The MovinCool Classic Plus 26 has all the benefits of our proven Classic Series, PLUS new features designed to increase performance and control. The versatile Classic Plus is instantly ready to provide cool air in the hottest environments such as production lines, outdoor events, manufacturing processes, injection molding, metal forming and much more.

The Classic Plus features a digital temperature controller allowing the user to "set" the desired temperature. At 24,000 Btu/hr of cooling, The Classic Plus 26 provides the maximum capacity possible operating on standard 208/230V power. By cooling only the area that needs it, the Classic Plus 26 saves you money while protecting people and equipment and speeding up processes. Self-contained and portable, the Classic Plus 26 requires little or no installation - simply roll it in, plug it in and turn it on.

\*\* Exhaust duct required in most cases.

- Digital temperature control . . . "set" the desired temperature and walk away.
- Operates on standard 208/230V power. . . can be used anywhere for as little as 15 cents per hour.
- Provides up to 24,000 Btu/hr of cool air. . . maximum spot cooling to just the spot that needs it.
- Handles temperatures above 115°F. . . provides cooling in the hottest environments.
- Condensation overflow control . . . prevents overflow when condensation builds up.
- UL Listed . . . assures safe operation.

## Classic 18

When you need a little more cooling than the Classic 10, but still want maximum portability, the MovinCool Classic 18 fits the bill. With standard 220V plugs, this unit is instantly ready to provide cool air anywhere. It is designed to work in the hottest environments such as production lines, outdoor events, manufacturing processes, injection molding, metal forming and much more. By cooling only the area that needs it, the Classic 18 saves you money while protecting people and equipment and speeding up processes. Self-contained and portable, the Classic 18 requires little or no installation - simply roll it in, plug it in and turn it on.

\*\* Exhaust duct required in most cases.

- Handles temperatures up to 115°F. . . provide cooling in the hottest environments.
- Available in 18,000 Btu/hr capacities . . . there's a MovinCool to handle any hot spot.
- Half the cost of central air conditioning, cooling for as little as 20 cents per hour. . . no costly installation is necessary.
- Condensation overflow control. . . prevent overflow when condensation builds up.
- Rugged design . . . proven durability since 1982.
- UL Listed . . . assure safe operation.

## Classic Plus 26

The MovinCool Classic Plus 26 has all the benefits of our proven Classic Series, PLUS new features designed to increase performance and control. The versatile Classic Plus is instantly ready to provide cool air in the hottest environments such as production lines, outdoor events, manufacturing processes, injection molding, metal forming and much more.

The Classic Plus features a digital temperature controller allowing the user to "set" the desired temperature.
